School Set for 2018

The date for the 2018 CCAMS Measurement School will be February 21 & 22, 2018 at the Omni Bayfront Hotel in downtown Corpus Christi. The Omni has hosted the school in years past and provides an excellent learning environment for the school's attendees. Students will be able to attend any of the more than 60 classes where instructors lecture on meter operations/maintenance, gas and liquid measurement accuracy, and meter proving, among others. As well, students can gain insight into the measurement field with classes for instrument calibration, lab field testing procedures, equipment overviews, and hands-on demonstrations. In addition to classes, more than 70 companies will display cutting edge technology with products and services in the exhibit area. Nearly 500 people attended the 2017 School, therefore networking opportunities abound with folks representing the crude oil, natural gas, and refined products fields. So, mark your calendars and we hope to see you there!

Two of the 38 CCAMS Scholarship winners are Vito (left) and Nicolas Recio, who attend Texas A&M-Kingsville. *Submitted Photo*

Scholarship Winners Named

In an ongoing commitment to helping students achieve their educational goals, the CCAMS Board of Directors recently awarded 38 scholarships to area students attending college and trade schools this fall.

Each year, CCAMS brings together various experts in the oil and gas measurement industry at its annual Measurement School. Through attendance fees, money is raised not only to hold the school, but also to fund scholarships for students.

This year's school was no exception as the Board awarded a total of \$53,000 in scholarships to students attending schools across the state of Texas and beyond. CCAMS sends the scholarships to the students' schools to be used for tuition & fees.

The Board wishes to congratulate each of *Continued on page 2*

Get Your Company's Name Out There

The 2017 Measurement School saw nearly 500 students in attendance. These attendees included not only college and trade school students, but also industry personnel such as measurement technicians and managers. Thus, the CCAMS Measurement School is an excellent opportunity to get your company's name out to your customers. The exhibit area had over 70 vendors this year, and we expect the same next year. Interested in sponsoring a post-school "meet & greet"? Side events held concurrently or in conjunction with the school are excellent ways to spotlight your company's offerings. Drawings for door prizes assist companies in promoting name recognition. Also, donating branded items for use by attendees will remind them of the goods and services your company offers.
